

Business and Property Protection Portal

The Business and Property Protection Portal (BPPP) highlights the risk factors affecting any business in any UK postcode, and provides necessary guidance.

A web portal to guide you through the importance of resilience measures

Why use the BPPP?

The BPPP includes a huge library of selected risk-control guides, resources, products and services. The portal provides state-of-the-art guidance to help protect businesses against known geographical and occupational challenges.

All you have to do is input four key areas of information, the business type, postcode, complete a number of standard check boxes, and the big-data takes care of the rest to generate a bespoke report of suggested loss-mitigation measures. This helps MDs with ongoing duties to ensure the business is resilient.

Features

- The portal has collated risk-control data and statistics specific to postcodes in the UK, including:
 - › fire loss statistics and emergency service response times
 - › flood data, weather and geographical risk factors
 - › theft, vandalism and cyber-crime statistics
- The tool was developed by RISC Authority (Risk Insight, Strategy and Control Authority) and the Fire Protection Association (FPA)

Benefits of the Business and Property Protection Portal

- Provides tailored analysis for business risks including fire, flood, weather and crime
- Supports CEOs and MDs in protecting profit, taking care of the workforce, and acting in the long-term interests of all stakeholders
- Presents advice in a meaningful way, providing recognised industry standard guidance
- A cost-effective way of maintaining engagement with customers, especially where site visits are less frequent
- Provides insurance loss statistics which can help estimate the costs involved in the event of loss or damage
- Identifies locations where Fire Service Response may be inadequate for meeting property protection/business resilience ambitions
