

# Vehicle Tracking by Radius Telematics

Help improve your drivers' behaviour and road risk

## Who are Radius Telematics?

Radius Telematics provide real time data to improve the management and efficiency of your vehicle fleet. From simple positional asset trackers to fully connected devices that record key diagnostic data from your vehicle's EMS (Engine Management System). It is suitable for businesses with small and large fleets and devices are designed to fit cars, vans, trucks and motorbikes.

## What is the Kinesis Vehicle Tracking Solution?

Radius Telematics' best selling software Kinesis allows you to manage vehicle's and driver performance, get critical alerts and much more. Businesses can access the system from their PC, tablet or the mobile phone app making it perfect for managers when you are on the move.

### The key benefits

- You can monitor how quickly vehicles are being driven, where they are and when the vehicle arrived at a specific location
- Increase the security of your assets by using geocaching technology to receive alerts
- Help drivers stay safe on the road and reduce accidents by using the driver behaviour data available
- Through vehicle performance data, your business may save on fuel costs by highlighting inefficient driving practices
